

PV-SHELTER RMS RAD SERIES

PV-Shelter RMS RAD Series is designed for radius roof shelters.

Urban Solar's PV-Shelter is the world's most powerful and reliable solar powered LED shelter lighting system, specifically designed for the transit industry.

PV-Shelter systems easily mount to new or existing transit bus shelters, with various configurations tailored to meet your agency's safety, branding, and performance needs.

Delivering safe and environmentally friendly lighting through superior quality, reliability, and innovative designs, the PV-Shelter Series is the ideal solution for your agency's bus shelter lighting demands.
